## Mainstream Typing Tutor

### Thanks Dad!

"I first learned to touch type when I was 9 years old. I was pretty slow at first but I got a lot quicker... in my 20's I was recorded typing at 138 wpm.

#### How did you hear about KAZ?

My dad bought us KAZ when we were kids and the skill has been one of the greatest things I have carried with me from my youth.

#### How important do you think the skill of touch typing is?

I applied for a job where I needed to do a typing test and scored around 135wpm.

The examiners didn't believe my score. They thought I had somehow cheated, so made me do the test again. Second time around I scored slightly less, 125wpm.

They had never seen anyone type faster than 100wpm!  
(The requirement for the test was 60wpm.)

#### How has KAZ helped in life?

Over the years it has helped with school assignments, essays at Uni and now in my work. It's really handy to be able to type as quickly as I think.

#### Anything else?

I still have my KAZ CD-ROM from the 90s that I really treasure.

#### Final thoughts?

I hope many people have as much success as I have with typing correctly.
